

## THE INTERNATIONAL HEADQUARTERS OF THE SUFI MOVEMENT

Office of the Representative-General  
and the President of the International Publications Committee

*The aim of the International Sufi Movement's Activity called "Universal Worship"  
is to invite all of good will to envision the Unity of Spiritual Ideals,  
which reaches beyond distinctions and differences like a stream of water spreading beyond all conceptual boundaries.  
In the inward longing for unity, we discover that we are all as so many drops of one and the same ocean of Truth.*

**"True religion is in recognizing the one Light in all the different religions"**

Hazrat Inayat Khan, Cheragspaper September 16, 1923

Beloved siraj(a)s, cherag(a)s and candidate-cherag(a)s,

Please find below words of our beloved Master Hazrat Inayat Khan from a part of cheragspaper September 16, 1923 (Religious Gatheka nr. 35). In this cheragspaper Murshid speaks about the message of religion in various forms; he speaks about the distinct religions and teachers, but of one and the same Light.

*"What is religion? Religion is a lesson which will teach the manner of living aright and reaching the object for which we are born. This religion has come time after time to the world, through those who have brought the Message of God. Those who came with the message of religion have given it in diverse forms in accordance with the evolution of the people at that particular time. But the religion was one and the same. There never has been any other religion than the one that God is one and Truth is one, and so the religion is one. If there is any difference, it is a difference of form, not of soul. It is the same pure water poured into several pitchers, one made in India, one in China, one in Arabia, one perhaps in the Western world. It is like a stream which comes through fountains and falls in various drops, but which is the same water"*

May you be inspired to read this cheragspaper and also become more and more conscious that, as Hazrat Inayat Khan says, "the Sufi Message is the learning of the essence of religion".

Thank you so much for your contribution to the spreading of the Sufi Message and sending most loving greetings,

Ulma Moerenburg
